Jagannaickpur, Kakinada

Department of Microbiology

Activity Register 2018-2019

Date	24-11-18
Conducted through (DRC/JKC/ELF/NCC/NSS/ Departments etc.)	Department of Microbiology
Nature of Activity (Seminar/Workshop/Extn.Lecture etc.,)	FIELD VISIT/ TOUR
Title of the Activity	Field visit to HRS, Ambajipeta
Name of the Department/Committee	Department of Microbiology
No. of students participated	27
Brief Report on the activity	II BSc and III BSc Students visited H.R.S, Ambajipeta. For BSR: Integrated disease management practices for basal stem rot disease were developed which involved the steps such as application of recommended dose of fertilizers to the coconut palms every year, sowing of indicator plants viz., red gram and bengal gram seeds in the tree basins and observation for symptom development there by early detection of the disease. Bud rot : Integrated disease management package developed for bud rot disease, which comprised clean cultivation, removal of dead and decomposed trees, cleaning of the effected regions and application of talc powder formulation of P.fluorescence or T. viride in crown region of coconut seedlings is recommended. Leaf Blight Root feeding with carbendazim at 2% concentration at the rate of 100 ml/palm thrice at quarterly intervals was effective in reducing the leaf blight disease.
Name of the Lecturers who Planned & conducted the activity	Dr. K. Aruna
Signature of the Dept. In-Charge/Convener of the Committee	 24/11/18
Signature of the Principal	
Remarks	... good activity.
