**Identification and Activities for Slow and Advanced
Learners**

2019-20

Introduction: During the path of Teaching and Learning process, teachers have to deal with different types of students; some are very bright who understand learn very fast and some are quite weak to learn and grasp the instructions very slowly. Some students need only guidance and some need a hard work and regular guidance. To determine the abilities in the class, particularly when initiating the higher education and proceeding for graduation, a faculty has to recognize the learning attitudes and learning habits of the students differently so as not to lose attention of slow learners and not to turn off the advance learners.

The purpose of these guidelines is to identify the slow and advanced learners in UG and to assign the supporting activities for both the groups. This will also help the teaching departments for proper mentoring of their mentee and to monitoring the progress.

Process Input: To start identification of slow and advanced learners, the following inputs are needed:

- Overall result of previous examination
- Result of internal assessment
- Class observation of subject teacher

Process of Identification: The process of assessment and identification of learning levels of the students and conduction of activities thereon should be carried out through a methodical technique:

1. Assessment of the learning levels of the students:

- Slow learner and advanced learners would be identified for each subject separately by respective subject teacher for all the semesters.
- Process to identify of slow learners and advanced learners would be conducted immediately after declaration of preceding semester university exam result or after one month of teaching in case of First year
- Every subject teacher should conduct class test / online objective type test of their subject on syllabus covered till date or on first unit of 20marks and duration of one hour to identify slow learners and advanced learners

- Slow and advanced learners are identified based on following parameters and their weightage.

Based on above parameter a report would be prepared for whole class for total 100%.

- The student securing marks below 40% would be identified as Slow Learners and the student securing marks above 70 % would be identified as Advanced Learners.

- After that separate list are prepared for both type of learners for further monitoring and conduction of problem solving sessions / revision sessions for them.

Expected Outcome

- Timely conduction of slow learner's activities
- Records based on student progress and observation.
- Improvement in University Result.

Activities for Slow Learners: Slow learners cannot learn at an average rate from the instructional material, text books and workbooks like the rest of the class, they have special needs to be understood need special instructional pacing, frequent feedback, corrective instruction, and/or modified materials, all administered under conditions sufficiently flexible for learning to occur.

Slow learners are taught in two instructional arrangements

1. Basic Course content with the average regular class
2. Special need base instructional arrangements which include learning material too.

SPECIAL NEED BASE INSTRUCTIONAL ARRANGEMENTS INCLUDING LEARNING MATERIAL

1. Individual counseling sessions to know about the learning gaps.
2. Remedial Coaching for additional teaching support which also includes special doubt clearing sessions
3. Tutorials and special chamber consultation hours for slow learners.
4. Extra notes.
5. Special help for preparation of internal examination process.
