(Re-Accredited by NAAC with 'B')

KAKINADA 533002, EASTGODAVARI, ANDHRA PRADESH

## HORTICULTURE SYLLABUS

2024 – 2025

DEPARTMENT OF HORTICULTURE

# **A.S.D GOVT. DEGREE COLLEGE FOR WOMEN (A)**

(Re-Accredited by NAAC with 'B')

KAKINADA 533002 EASTGODAVARI, ANDHRA PRADESH

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 6A Theory Syllabus

## **ORNAMENTAL HORTICULTURE**

(Skill Enhancement Course (Elective))

---

### **SYLLABUS**

#### **Unit -1: Introduction to Ornamental Horticulture** (10h)

1. History, Definition, scope of gardening, aesthetic values; types of gardens in India.
2. Landscaping, basic principles and basic components.
3. Principles of gardening, garden components and adornments.
4. Lawn types, establishment and maintenance; methods of designing rockery and water garden.

#### **Unit -2: Types of Ornamental gardens** (10h)

1. Special types of gardens, trees, their design, their walk-paths, bridges, constructed features.
2. Garden structures – greenhouse, glass house, net house.
3. Values in landscaping; propagation-planting of shrubs and herbaceous perennials.

#### **Unit-3: Plants in Ornamental gardens** (10h)

1. Importance, design values, propagation, planting of following annuals, biennials and perennials:  
(a) Climbers (b) Creepers (c) Palms (d) Ferns (e) Grasses (f) Cacti (g) Succulents

#### **Unit-4: Ornamental gardening – public utility** (10h)

1. Cultural operations in ornamental gardens.
2. Bio-aesthetic planning, definition, need; round country planning; urban planning and planting - avenues, educational institutions, villages.
3. Beautifying railway stations, dam sites, hydroelectric stations, colonies, river banks, Planting material for play grounds.

#### **Unit-5: Ornamental gardening in residences** (10h)

1. Bottle garden, terrariums.
2. Vertical gardens, roof gardens.
3. Culture of bonsai, art of making bonsai

## **Additional Inputs :**

UNIT-1: present status and future scope of tropical and subtropical fruits in india

UNIT-2: Garden types-Roof Garden,Sunken Garden

UNIT-3: cycads,

UNIT-4: childrens park,Highways

UNIT-5: Vegetable garden or kitchen garden

# A.S.D GOVT. DEGREE COLLEGE FOR WOMEN (A)

(Re-Accredited by NAAC with 'B')

KAKINADA 533002 EASTGODAVARI, ANDHRA PRADESH

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 6A Practical Syllabus

## ORNAMENTAL HORTICULTURE

(Skill Enhancement Course (Elective))

---

**Learning Outcomes:** On successful completion of this practical course, student will be able to:

1. Identify various components required for ornamental garden development.
2. Perform various skills related to establishment and maintenance of an ornamental garden.
3. Demonstrate skills of making developing a lawn and bonsai.
4. Make landscape design using CAD.

**Practical (Laboratory) Syllabus:** (30 hrs)

1. Identification and description of various plants grown in ornamental gardens.
2. Tools, implements and containers used in ornamental gardening.
3. Planning, designing and establishment of garden features viz. lawn, hedge and edge, rockery etc.,
4. Demonstration of types and styles of gardens using photos or videos.
5. Planning, designing and establishment of water garden, carpet bedding, shade garden, roof garden.
6. Preparation of land for lawn and planting.
7. Exposure to CAD (Computer Aided Designing)
8. Demonstration of bonsai making.
9. Study and creation of terrariums, vertical garden

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 7A Theory Syllabus

## COURSE 7A: COMMERCIAL FLORICULTURE

(Skill Enhancement Course (Elective))

### SYLLABUS

#### Unit-1: Basic concepts of floriculture

(10h)

1. Aesthetic, cultural and industrial importance of flowers; domestic and export marketing of flowers.
2. Floriculture - Importance, area and production in Andhra Pradesh and India.
3. Scope and importance of commercial floriculture in A.P., and India.

#### Unit-2: Production technology-1

(10h)

1. Production techniques of following flowering plants for domestic and export market:  
(a) Rose (b) *Chrysanthemum* (c) Marigold (d) Tuberose (e) *Crossandra* (f) Jasmine

#### Unit-3: Production technology-2

(10h)

1. Production techniques of following flowering plants for domestic and export market:  
(a) *Anthurium* (b) *Gerbera* (c) *Gladiolus* (d) *Dahlia* (e) *Heliconia* (f) Orchid

#### Unit-4: Plant breeding of flowering ornamentals

(10h)

1. Objectives and techniques in ornamental plant breeding.
2. Introduction, selection, hybridization, mutation and biotechnological technique for improvement of following ornamental and flower crops.  
(a) Carnation (b) *Petunia* (c) *Geranium* (d) *Cosmos* (e) *Hibiscus* (f) Snapdragon

#### Unit-5: Post-harvest practices in floriculture

(10h)

1. Growing of flowering plants under protected environments such as glass house, plastic house, net house, etc.
2. Importance of flower arrangement; Ikebana - techniques, types, suitable flowers and cut foliage.
3. Post-harvest technology of cut and loose flowers in respect of commercial flower crops.
4. Dehydration techniques for drying of flowers, scope importance and status.

### Additional Inputs :

UNIT-1: present status and future scope of tropical and subtropical fruits in india

UNIT-2: Lily, Tulip

UNIT-3: begonia, sunflower

UNIT-4: aster, foliage plants

UNIT-5: bunching and packaging, transport

### III. References:

HORTICULTURE SEMESTER - V, COURSE – 7A Practical Syllabus

## COURSE 7A: COMMERCIAL FLORICULTURE

(Skill Enhancement Course (Elective))

---

**Learning Outcomes:** On successful completion of this practical course, student will be able to:

1. Identify different flowering plants of commercial value.
2. Perform skills in propagation of flowering plants.
3. Demonstrate skills of post-harvest handling of flowers.
4. Perform skills of floral arrangements or making floral products.

**Practical (Laboratory) Syllabus:** (30 hrs)

1. Identification of commercially important floricultural crops.
2. Propagation technique in *Hibiscus*/*Rose*/*Chrysanthemum*/tuberose.
3. Propagation technique in *Gladiolus*/carnation/*Petunia*
4. Sowing of seeds and raising of seedlings of a flowering plant.
5. Training and pruning of rose/*Jasminum*.
6. Drying and preservation of flowers.
7. Use of chemicals and other compounds for prolonging the vase life of cut flowers.
8. Flower arrangement practices.
9. Preparation of bouquets, garland, veni and gajara.

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 6B Theory Syllabus

**COURSE 6B: : PRECISION FARMING AND PROTECTED CULTIVATION**

(Skill Enhancement Course (Elective))

---

## **Unit -1: Introduction to Precision Farming** (10h)

1. Precision farming – Introduction and history, Importance and Scope.
2. Laser leveling, mechanized direct seed sowing seedling and sapling transplanting.
3. Mapping of soils and plant attributes.

## **Unit -2: Management in Precision Farming** (10h)

1. Site specific input application.
2. Weed management, Insect pests and disease management.
3. Yield mapping in horticultural crops.

## **Unit-3: Types of Green Houses** (10h)

1. Green house technology – Introduction viz. Importance, scope, advantages and dis-advantages.
2. Types of Green Houses based on shape, utility, construction and cladding materials.
3. Plant response to Greenhouse environment.

## **Unit-4: Construction of Green House** (10h)

1. Planning and design of greenhouses.
2. Design criteria of greenhouse for cooling and heating purposes.
3. Green house equipment; Materials of construction for traditional and low cost green houses.
4. Irrigation systems used in greenhouses.

## **Unit-5: Farming in Green House** (10h)

1. Net house cultivation, Passive solar green house, Green house drying.
2. Choice of crops for cultivation under greenhouses: Capsicum, Cucumber, Broccoli, Cabbage, Spinach, Lettuce.
3. Cost estimation and economic analysis.

# A.S.D GOVT. DEGREE COLLEGE FOR WOMEN (A)

(Re-Accredited by NAAC with 'B')

KAKINADA 533002 EASTGODAVARI, ANDHRA PRADESH

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 6B Practical Syllabus

**COURSE 6B: : PRECISION FARMING AND PROTECTED CULTIVATION**

(Skill Enhancement Course (Elective))

---

**Learning Outcomes:** On successful completion of this practical course, student will be able to:

1. Identify various material and equipment required for green house construction.
2. Perform various skills related to preparation of soil and other media for cultivation under a protected structure.
3. Demonstrate operational skills related to equipment in a green house.
4. Make the calculation related to input-output economics.

**Practical (Laboratory) Syllabus:** (30 hrs)

1. Study of different types of greenhouses based on shape, utility.
2. Study of different types of greenhouses based on construction and cladding materials.
3. Testing of soil and water to study its suitability for growing crops in greenhouses.
4. Growing media, Soil culture- type of soil required.
5. Study of irrigation, drainage - flooding and leaching.
6. Soil pasteurization in peat moss and mixtures, Rock wool and other inert media.
7. Nutrient film technique (NFT), Hydroponics.
8. Study of cultivation of a crop in green house.
9. Economics of protected cultivation

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 7B Theory Syllabus

**COURSE 7B: POST-HARVEST MANAGEMENT OF HORTICULTURAL CROPS**

(Skill Enhancement Course (Elective))

---

## **Unit -1: Introduction to Post Harvest Technology** (10h)

1. Importance of Postharvest Technology in horticultural crops; Pre-harvest factors affecting quality.
2. Maturity, types of maturity and factors affecting maturity of horticultural crops.
3. Maturity indices, harvesting, handling, grading of fruits- Mango, Banana, Papaya, Citrus and Guava.

## **Unit -2: Maturity and harvesting indices** (10h)

1. Maturity indices, harvesting, handling, grading of:
  - a) Vegetables - Tomato, Cabbage, Onion
  - b) Cut flowers - Rose, *Chrysanthemum*, Tuberose
  - c) Plantation crops - Coconut, Cashew nut, Coffee

## **Unit-3: Post harvest problems and treatments** (10h)

1. Factors responsible for deterioration of fruits, vegetables, cut flowers.
2. Physiological and bio-chemical changes during ripening; Hastening and delaying ripening process.
3. Postharvest treatments of horticultural crops –VHT, HWT, irradiation, fungicidal and chemical.

## **Unit-4: Storage of Horticulture products** (10h)

1. Quality parameters and specification in fruits, vegetables and cut flowers.
2. Structure of fruits, vegetables and cut flowers related to physiological changes after harvest.
3. Methods of storage for local market and export.
4. Pre-harvest treatment and pre-cooling, pre-storage treatments.

## **Unit-5: Storage and packaging** (10h)

1. Different systems of storage.
2. Packaging methods and types of packages, recent advances in packaging-vacuum packaging, poly shrink packaging, grape guard.
3. Types of containers and cushioning materials, packing treatments and cold storage; Modes of transport

HORTICULTURE SEMESTER - V, COURSE – 7B Practical Syllabus

## COURSE 7B: POST-HARVEST MANAGEMENT OF HORTICULTURAL CROPS

(Skill Enhancement Course (Elective))

---

**Learning Outcomes:** On successful completion of this practical course, student will be able to:

1. Identify the maturity and harvesting indices of horticulture products.
2. Perform various skills related to manual and mechanical grading of horticulture products.
3. Identify causes for losses of horticulture products in store houses.
4. Demonstrate skills on packaging and transport of horticulture products.

**Practical (Laboratory) Syllabus:** (30 hrs)

1. Study of maturity indices of fruits, vegetables, flowers and plantation crops.
2. Determination of physiological loss in weight and quality
3. Grading of horticultural produce (manual and mechanical).
4. Post-harvest treatment of horticultural crops, physical and chemical methods.
5. Identification of pests and diseases of Horticulture products in storage.
6. Study of post-harvest disorders in horticultural produce.
7. Study of facilities of storage units and methods of storage.
8. Packaging in fruits, vegetables by using different packaging materials
9. Packaging in plantation crops and cut flowers by using different packaging material

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 6C Theory Syllabus

**COURSE 6C: WATER MANAGEMENT IN HORTICULTURAL CROPS**

(Skill Enhancement Course (Elective))

---

## Unit -1: Importance of water for plants

(10h)

1. Importance of water to plants, hydrological cycle; water resources in Andhra Pradesh and India.
2. Area of different crops under irrigation; function of water for plant growth.
3. Effect of moisture stress on crop growth; Available and unavailable soil moisture – distribution of soil moisture.
4. Water budgeting – kinds of water- rooting characteristics – moisture extraction pattern.

## Unit -2: Water for horticultural crops

(10h)

1. Water requirement of horticultural crops – net irrigation requirement, gross irrigation requirement.
2. Lysimeter studies, Plant water potential climatological approach – use of pan evaporimeter- Consumptive use of pan evaporimeter.
3. Definition of evaporation, transpiration, evapo-transpiration and potential evapo-transpiration.

## Unit-3: Irrigation methods

(10h)

1. Factor for crop growth stages – critical stages of crop growth for irrigation; irrigation scheduling – different approaches.
2. Soils quality of irrigation water, irrigation management practices for different soils and crops.
3. Methods of Irrigation- classification, border, check basin, Square and ring basin, furrow irrigation methods.

## Unit-4: Modern methods of irrigation

(10h)

1. Sub-surface pressurized methods; sprinkler- definition, adoptability, limitations.
2. Components and types of sprinkle irrigation system, layout, fertilizer applicator.
3. Drip irrigation system – definition, advantages, dis- advantages, components, fertilizer applicator, layout.

## Unit-5: Water management

(10h)

1. Water management problem, merits and demerits; Water use efficiency (WUE), factors effecting WUE.
2. Methods to improve economic use of water for irrigation.
3. Water use for maximum profit of garden/orchard ecosystem; water management for problem soils.

**COURSE 6C: WATER MANAGEMENT IN HORTICULTURAL CROPS**

(Skill Enhancement Course (Elective))

---

**Learning Outcomes:** On successful completion of this practical course, student will be able to:

1. Determine water requirement of a crop plant.
2. Perform skills related to determination of soil moisture constants.
3. Operate equipment of sprinkler and drip irrigation.
4. Make layouts for different irrigation methods.

**Practical (Laboratory) Syllabus:** (30 hrs)

1. Determination of water potential.
2. Estimation of soil moisture constants.
3. Determination of soil moisture by air oven method.
4. Estimation of irrigation efficiency of horticultural crops,
5. Estimation of water requirements of horticultural crops.
6. Collection of field data for designing micro-irrigation system for orchard and vegetable crops.
7. Study of different components of drip irrigation system.
8. Study of different components of sprinkler irrigation system.
9. Study of fertilizer application system

III Year B.Sc Degree Examinations at the end of V Semester 2024-2025

HORTICULTURE SEMESTER - V, COURSE – 7C Theory Syllabus

**COURSE 7C: SOIL FERTILITY AND NUTRIENT MANAGEMENT**

(Skill Enhancement Course (Elective))

## **Unit -1: Introduction to Soil fertility and soil productivity** (10h)

1. History of soil fertility, definition of soil fertility and productivity; essential nutrient elements and functions, deficiency symptoms.
2. Mechanism of Nutrient transport / uptake to plants and nutrient availability.
3. Acid, calcareous and salt affected soil characteristics and management

## **Unit -2: Soil organic matter** (10h)

1. Role of micro-organisms in organic matter decomposition and humus formation.
2. Importance of C:N ratio and pH in plant nutrition soil buffering capacity.
3. Main objectives of INM, components of Integrated plant nutrient management (IPNM); soil fertility evaluation methods: chemical, biological and by visual symptoms, critical levels of different nutrients and hidden hunger in soil.
4. DRIS Approach, critical limit approach,

## **Unit-3: Manures and fertilizers** (10h)

1. Manures and fertilizer classification and manufacturing process; properties and fate of major and micronutrient in soils.
2. NPK fertilizers: composition and application methodology, luxury consumption, nutrient reactions, deficiency symptom by visual diagnosis.
3. Secondary and Micronutrient fertilizers their types, composition, reaction in soil and effect on crop growth.
4. Time and methods of manures and fertilizers application; foliar application and its concept.

## **Unit-4: Modern methods of irrigation** (10h)

1. Fertilizer control order; nutrient interactions, plant nutrient toxicity symptoms and remedial measures.
2. Effect of potential toxic elements in soil and plant.
3. Soil test crop response and targeted yield concept.

## **Unit-5: Water management** (10h)

1. Biofertilizers: importance, types and use in horticultural crop.
2. Nutrients use efficiency (NUE) and management.

## **II. References:**

1. Mengel, et al., 2001. Principles of Plant Nutrition (5th Edition), Springer.

## COURSE 7C: SOIL FERTILITY AND NUTRIENT MANAGEMENT

(Skill Enhancement Course (Elective))

---

**Learning Outcomes:** On successful completion of this practical course, student will be able to:

1. Diagnose nutrient deficiencies in plants.
2. Estimate organic matter, major and minor nutrients in soil.
3. Determine the adulteration of fertilizers.
4. Perform skills related to INM and IPNM.
5. Perform skills related to application of soil amendments.

**Practical (Laboratory) Syllabus:** (30 hrs)

1. Determination of organic matter (Organic carbon) in soil and interpretations.
2. Determination of available Nitrogen in soil and interpretations.
3. Determination of available P in soil and interpretations.
4. Determination of available K in soil and interpretations.
5. Determination of available S in soil and interpretations.
6. Determination of exchangeable Calcium and Magnesium by Versenate (EDTA) Method.
7. Determination of soil Micronutrients
8. Fertilizer Adulteration test / Identification of Adulteration in fertilizer / Detection of adulteration in fertilizers (Rapid test)
9. Determination of Gypsum requirement of saline and alkali soils.
10. Determination of Lime requirement of acid soils.
11. Use of soil testing kit and use of leaf colour chart for nutrient deficiency diagnosis.
12. Study of various biofertilizers.

HORTICULTURE SEMESTER - V, COURSE – 6D Theory Syllabus

## COURSE 6D: DRYLAND HORTICULTURE

---

(Skill Enhancement Course (Elective))

### Unit -1: Introduction to Dryland horticulture (10h)

1. Definition, importance and limitation of dry land horticulture.
2. Present status and future scope. Constraints encounter in dry lands.
3. Agro-climatic features in rain shadow areas, scarce water resources, high temperature, soil erosion, run-off losses etc.

### Unit -2: Soil and Water Management (10h)

1. Techniques and management of dry land horticulture: watershed development, soil and water conservation methods-terraces, contour bunds, etc.
2. Methods of control and impounding of run-off water-farm ponds, trenches, macro catch pits, etc.
3. *in-situ* water harvesting methods, micro catchment, different types of tree basins etc.

### Unit-3: Methods for efficient water use (10h)

1. Methods of reducing evapotranspiration, use of shelter belts, mulches, antitranspirants, growth regulators, etc.
2. Water use efficiency-need based, economic and conjunctive use of water, Micro systems of irrigation etc. IFS concept and alternate land use systems.
3. *in-situ* water harvesting methods, micro catchment, different types of tree basins etc.

### Unit-4: Modern methods of irrigation (10h)

1. Characters, special adaptation and cultivation practices of following horticultural crops:  
(a) Ber (b) Annona (c) Pomegranate (d) Tamarind

### Unit-5: Water management (10h)

- Characters, special adaptation and cultivation practices of following horticultural crops:  
(a) Fig (b) Wood apple (c) Marking nut (d) Carambola

HORTICULTURE SEMESTER - V, COURSE – 6D Practical Syllabus

## **COURSE 6D: DRYLAND HORTICULTURE**

(Skill Enhancement Course (Elective))

---

**Learning Outcomes:** On successful completion of this practical course, student will be able to:

1. Study the rainfall pattern and water deficit conditions in an area.
2. Perform skills on harvesting and conservation of rain water.
3. Identify the adaptation of plants to dryland areas.
4. Perform skills related to irrigation methods suitable to dryland areas.
5. Perform skills on checking evapo-transpiration.

**Practical (Laboratory) Syllabus:** (30 hrs)

1. Study of rainfall patterns.
2. Practicing contour bunding and trenching.
3. Studying micro catchments.
4. Studying soil erosion and its control in a dryland area.
5. Study of evapotranspiration and methods to control.
6. Practicing mulching methods.
7. Irrigation systems - Surface, Sub-surface; micro irrigation methods.
8. Study of special techniques of planting and aftercare in dry lands.
9. Study special horticultural practices in dry land plants.
10. Training and pruning in dry land plants.
11. Study of morphological and anatomical features of drought tolerant fruit crops.
12. Study of morphological and anatomical features of salinity tolerant fruit crops.

## COURSE 7D: PLANTATION CROPS

(Skill Enhancement Course (Elective))

### Unit -1: Introduction to Plantation crops (10h)

1. Plantation crops: Definition, history and development, scope and importance; Differences between plantation and fruit crops
2. Area and production, export and import potential, role in national and state economy.
3. Important research stations on plantation and beverage crops and their role.

### Unit -2: Oil yielding crops (10h)

Soil, climate requirements, varieties, propagation methods, cultivation practices, physiological disorders, pests, diseases and their management, post-harvest technology, yield and economics of:

- (a) Coconut (b) Oil palm

### Unit-3: Masticatory crops (10h)

Soil, climate requirements, varieties, propagation methods, cultivation practices, physiological disorders, pests, diseases and their management, post-harvest technology, yield and economics of:

- (a) Areca nut (b) Betel vine

### Unit-4: Beverage crops (10h)

Soil, climate requirements, varieties, propagation methods, cultivation practices, physiological disorders, pests, diseases and their management, post-harvest technology, yield and economics of:

- (a) Coffee (b) Cacao

### Unit-5: Nut and Industrial crops (10h)

Soil, climate requirements, varieties, propagation methods, cultivation practices, physiological disorders, pests, diseases and their management, post-harvest technology, yield and economics of:

- (a) Cashew nut (b) Rubber
