## **REPORT ON THE ONLINE QUIZ**

An Online Quiz was conducted on the topic “Fundamentals of C Programming” using Google Forms during the Lockdown Period using Google Forms for the students of I B.Sc.(MPCS) & II B.Com(C.A.) to enhance their skill in C Programming. A total of 33 students had participated in the quiz. The certificates are generated using CERTIFYEM and the students who secured more than or equal to 40% marks in the quiz issued a certificate.

Google Forms is a part of Google's collection of online free tools, which began as a part of "Google Sheets" in 2008 and became a standalone in 2016. It's used for a variety of things like making quizzes, surveys, applications, polls... Google Form quizzes can have a personal use, educational use for teachers and students, or even professional use at work for receiving employee feedback. Creating quizzes is most easily done with Google Forms as it makes the process clear and simple.

Students appreciate receiving awards from their teachers. This little bit of recognition could encourage a student for weeks or months! In addition to this, students enjoy receiving certificates that say they have accomplished and/or mastered a particular concept, task, or skill. If students are working towards a certain certificate, then those students may be motivated to go above and beyond what they were already doing.

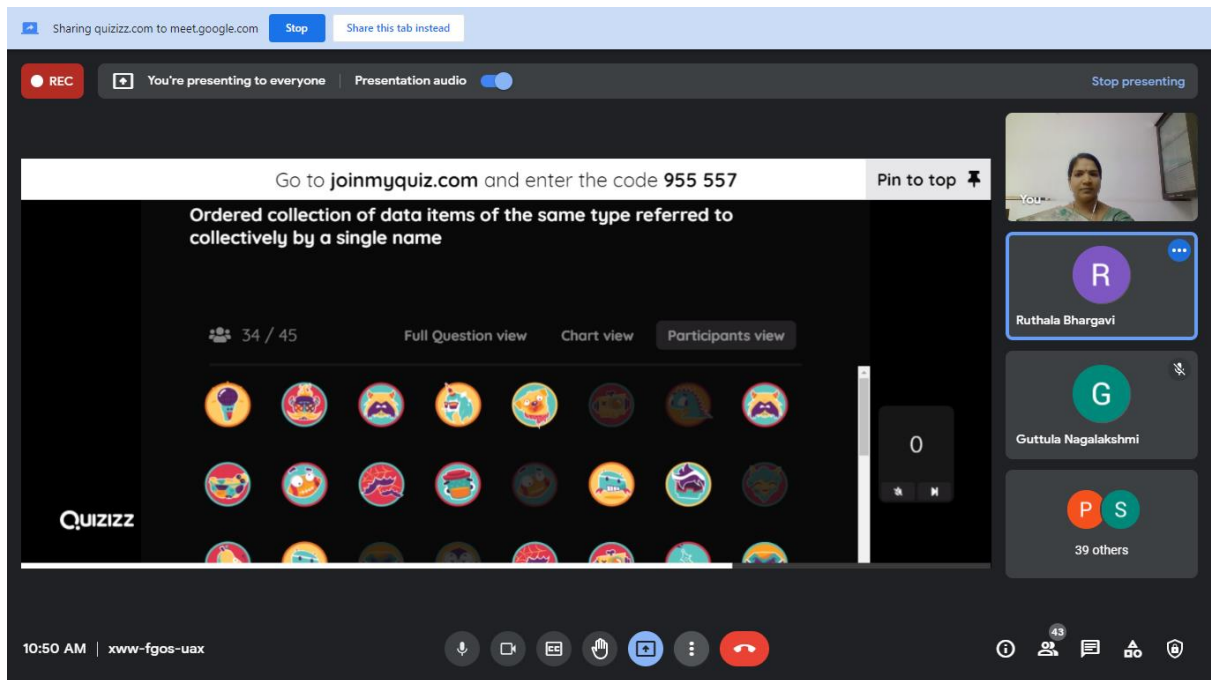

Therefore we encouraged the students by issuing the certificate to all the eligible students i.e who secured  $\geq 40\%$  marks.

## Questions:

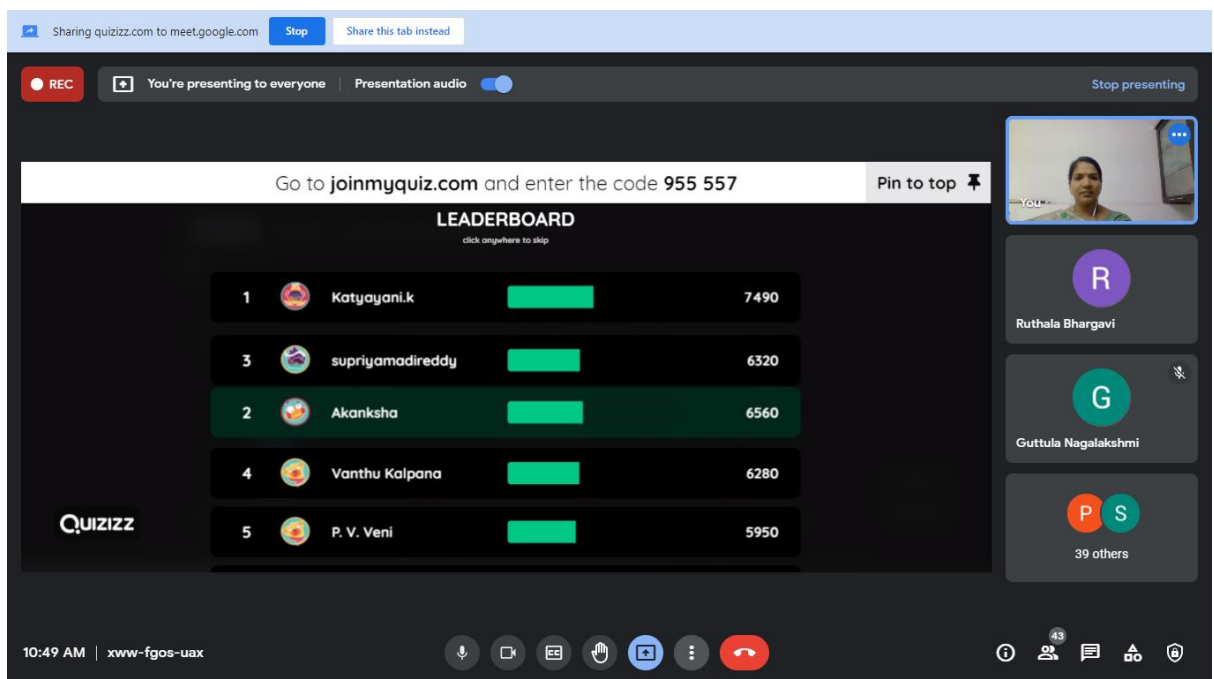

- Name the loop that executes at least once.  
a. for    **b. while**    c. do while    d. if
- Which one is not a keyword in C Language?  
a. **auto**    b. case    c. main    d. register
- Array is collection of objects of  
**a. same data type**    b. different data type  
c. all of these    d. None of these
- Which function is used to find length of string  
a. strcmp()    b. strlen()    c. strcat()    **d. strstr()**
- pointer is a variable which stores the \_\_\_\_\_ of another variable  
a. address    **b. value**    c. data type    d. size
- A C variable cannot start with  
a. An Alphabet    **b. A number**    c. Underscore    d. None of these
- Which operators are used to compare the values of operands  
a. Arithmetic operators    b. Logical operators  
**c. Relational operators**    d. Bit wise operators
- If storage class for a variable is not specified, by default it is automatic storage class  
a. **True**    b. False
- What will be the output of the following C code?  

```
#include <stdio.h>

void main()
{
    int x = 5;
    if (x < 1)
        printf("hello");
    else
        printf ("no");
}
```
- Which of the following is a collection of different data types?  
a. Array    **b. structure**    c. function    d. pointer
