## Brief Report on the Activity

*World Environment Day* is conducted on June 5, 2021 for the students of II year B.Sc(MPCs) and II year B.Com(CA) through online mode. A total of 40 students from B.Sc. (M.P.CS.) and B.Com.(C.A.) has participated and shared their views and ideas for the measures to be taken for providing a better Environment to the future generations in the activity “Think and talk for a While on Environment” on this account.

*World Environment Day* is the United Nations day for encouraging worldwide awareness and action to protect our environment. Since 1974, World Environment Day has been celebrated every year on 5 June, engaging governments, businesses and citizens in an effort to address pressing environmental issues.

World Environment Day offers a global platform for inspiring positive change. It pushes for individuals to think about the way they consume; for businesses to develop greener models for farmers and manufacturers to produce more sustainably; for governments to invest in repairing the environment; for educators to inspire students to take action; and for youth to build a greener future.

### Students presenting their ideas on “World Environment Day”

## **THEME OF 2021**

For too long, human have been exploiting and destroying planet's ecosystems. Every three seconds the world loses enough forest to cover a football pitch and over the last century hman have destroyed half of th wetlands. As much as 50 per cent of coral reefs have already been lost and up to 90 per cent of coral reefs could be lost by 2050, even if global warming is limited to an increase of 1.5°C.

Theme of world environment day 2021 is Ecosystem restoration ,means preventing, halting and reversing this damage – to go from exploiting nature to healing it. This World Environment Day will kick off the UN Decade on Ecosystem Restoration, a global mission to revive billions of hectares, from forests to farmlands, from the top of mountains to the depth of the sea.

Only with healthy ecosystems can we enhance people's livelihoods, counteract climate change and stop the collapse of biodiversity.

Every World Environment Day is hosted by a different country in which official celebrations take place. This year's host is Pakistan.
