41.	1832005	A. Jaya Lakshmi	II BSc (MPES)	A. Jaya Lakshmi
42.	1832037	P. Gowthami	II BSc (MPES)	P. Gowthami
43.	1832040	S. Haritha	II BSc (MPES)	S. Haritha
44.	1832004	U. Lakshmi	II BSc (MPES)	U. Lakshmi
45.	1832034	P. Madhu Priyanka	II BSc (MPES)	P. Madhu Priyanka
46.	1832038	P. Veni	II BSc (MPES)	P. Veni
47.	1832035	P. Jyothi	II BSc (MPES)	P. Jyothi
48.	1832043	T. Pragitha	II BSc (MPES)	T. Pragitha
49.	1832049	B. Roshini	II BSc (MPES)	B. Roshini
50.	1832050	K. Monika	II BSc (MPES)	K. Monika

WORLD AIDS DAY

World AIDS Day 2019: December 1 is celebrated as World AIDS Day every year all over the world. The main motto behind celebrating the day is to raise public awareness about AIDS. Acquired Immuno Deficiency Syndrome, is a pandemic disease caused due to the infection of Human Immunodeficiency Virus (HIV), which causes damage to the immune system.

It is dedicated to raise awareness, educate and improve the understanding of HIV as a global public health problem. It provides an opportunity to understand the interdependence between progress in ending Acquired Immunodeficiency Syndrome (AIDS) and progress towards universal health coverage and the right to health.

Everyone, regardless of who they are or where they live, has a right to health, which is also dependent on adequate sanitation and housing, nutritious food, healthy working conditions and access to justice.

World AIDS Day was first observed in 1988. And each year, different organisations across the world bring attention to the HIV epidemic, endeavour to increase HIV awareness and knowledge. According to World Health Organisation, "37.9 million people living with HIV at the end of 2018, 79 percent received testing, 62 percent received treatment, and 53 percent had achieved suppression of the HIV virus with reduced risk of infecting others."

The medical sciences found treatments for HIV, and various formulas have been also taken to fight against discrimination and to safeguard HIV patients with proper treatments. Still, there are millions of HIV patients, who still do not have access to tests, treatments and medications for HIV. So it is important to observe the day. It will act as a reminder for all that HIV still exists and we need to fight together to end this the disease. This year the theme for the World Aids Day 2019 is **"Ending the HIV/AIDS Epidemic: Community by Community"**

Importance of AIDS day

Over 101,600 people are living with HIV in the UK. Globally, there are an estimated 36.7 million people who have the virus. Despite the virus only being identified in 1984, more than 35 million people have died of HIV or AIDS, making it one of the most destructive pandemics in history.

Today, scientific advances have been made in HIV treatment, there are laws to protect people living with HIV and we understand so much more about the condition. Despite this, each year in the UK over 4,300 people are diagnosed with HIV, people do not know the facts about how to protect themselves and others, and stigma and discrimination remain a reality for many people living with the condition.

World AIDS Day is important because it reminds the public and government that HIV has not gone away – there is still a vital need to raise money, increase awareness, fight prejudice and improve education.

World AIDS Day was first conceived in August 1987 by James W. Bunn and Thomas Netter, two public information officers for the **Global Programme on AIDS** at the **World Health Organization** in Geneva, Switzerland.

Communities make the difference

The theme of this year's World AIDS Day is "Communities make the difference".

The commemoration of World AIDS Day, which will take place on 1 December 2019, is an important opportunity to recognize the essential role that communities have played and continue to play in the AIDS response at the international, national and local levels.

Communities contribute to the AIDS response in many different ways. Their leadership and advocacy ensure that the response remains relevant and grounded, keeping people at the centre and leaving no one behind. Communities include peer educators, networks of people living with or affected by HIV, such as gay men and other men who have sex with men, people who inject drugs and sex workers, women and young people, counsellors, community health workers, door-to-door service providers, civil society organizations and grass-roots activists.

World AIDS Day offers an important platform to highlight the role of communities at a time when reduced funding and a shrinking space for civil society are putting the sustainability of services and advocacy efforts in jeopardy. Greater mobilization of communities is urgently required to address the barriers that stop communities delivering services, including restrictions on registration and an absence of social contracting modalities. The strong advocacy role played by communities is needed more than ever to ensure that AIDS remains on the political agenda, that human rights are respected and that decision-makers and implementers are held accountable.

National Aids Control Programme (NACP) is a 100% centrally sponsored scheme by Ministry of Health and Family Welfare, Government of India. The programme is being implemented through the State AIDS Control Societies (SACS) and District AIDS Prevention and Control Units (DAPCUs) in the country to reduce new infections by 50% (2007 Baseline of NACP III) and to provide comprehensive care, support and treatment to all persons living with HIV/AIDS.
