## Certificate course Out Comes

First of all, touch typing makes working at a computer more comfortable. Second, it enhances communication colleagues and customers. Third, it improves the accuracy of documents. From a productivity standpoint, an individual's typing speed increases when switching from two finger typing to touch typing. Typing quickly and accurately allows students to complete assignments and tasks more swiftly. This efficiency gives them more time to focus on understanding the content and refining their work. Keyboarding has become a necessary skill for education and most careers. It has been become an important part of social relationships, helping to support email, social media, and other forms of communication.
