Brief Report
on
"INTERNATIONAL TRANSLATION DAY"
on
30.09.2019

As a part of Co-curricular Activity, the Departments of English & Telugu conducted an Inter Disciplinary Activity on the eve of "*International Translation Day*" on 30.09.2019.

Importance of the Day:

In view of globalization, knowing more Languages became need of the day. Students have to know how to translate one language to other.

All Languages have their own natural system of words, sentences and phrases. The usage of words in one Language may sound different in other Language . students may gain a chance to know the special characteristics of Languages with this type of programmes.

About this programme :

Students from different streams participated in this programme. They were given a few different stories in English & Telugu. Students were asked to translate English stories into Telugu, and Telugu stories into English in their own words as they understand them.

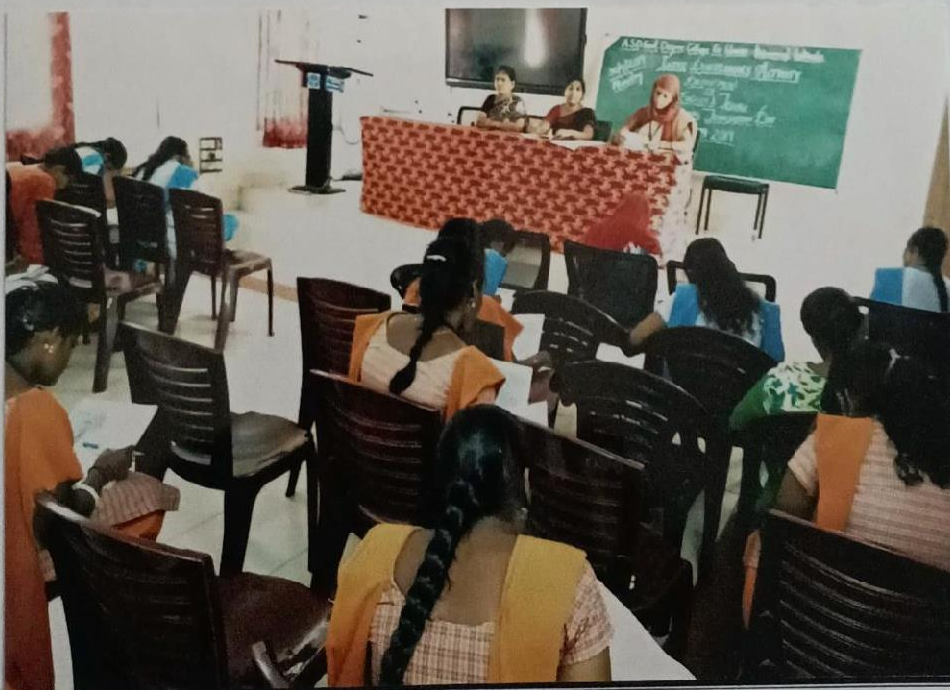

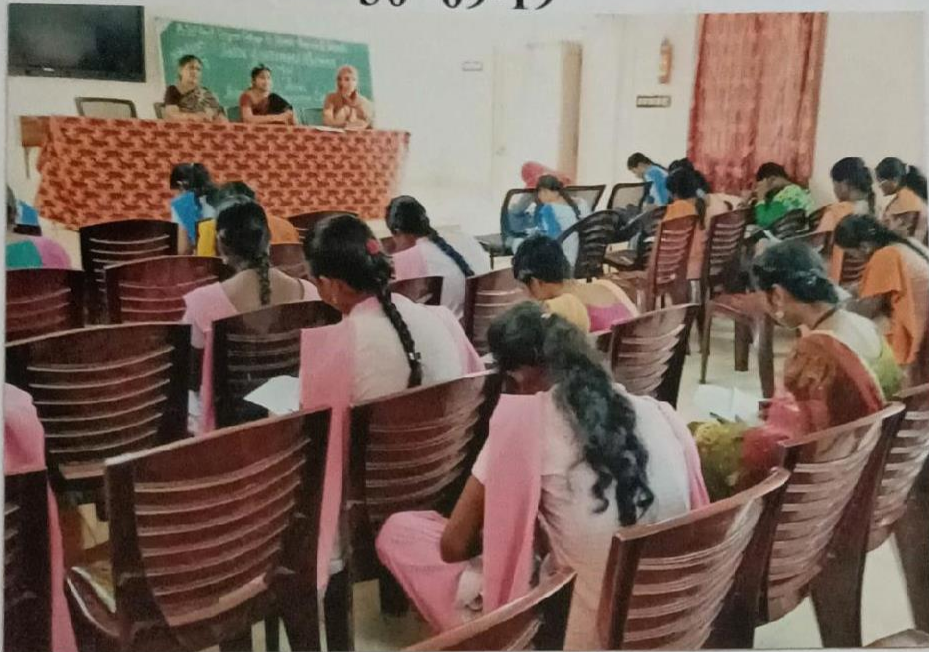

This is a very useful activity for students as English is an International Language, students need to learn English and their native Language perfectly. In this regard, students have to know how to make translations from English to Telugu & vice versa to develop proficiency in both the Languages.

Department of Home Science
Cottage Stay-REPORT - 2019-20

Cottage Stay/Residence course is one of the traditional methods of teaching Home Science. The Residence course offers an excellent opportunity for the practical training in the management of Home. Cottage stay is conducted in the department of Home Science every academic year wherein the students of semester 6 are formed into groups and organize the cottage stay simultaneously attending the regular classwork.

Cottage Stay provides the students a Home like situation where they learn the skill of performing household activities using the available resources wisely and run and manage the household to the best of their abilities. The management process basically includes the three steps, viz. 1) Planning 2) Execution or Controlling and 3) Evaluating. The students are taught to utilize these three steps to manage household tasks assuming the dual role of the residence home maker and a student as they attend the college regularly and manage the residence also. The basic tasks include staying in groups, planning, controlling, and evaluating the finance; food, time, energy, care of the house, entertainment and the best possible utilization of individual and group abilities. Home Management cottage stay brings forth the practical aspects of management and provides a setting, which approximates the conditions and facilities of well managed house

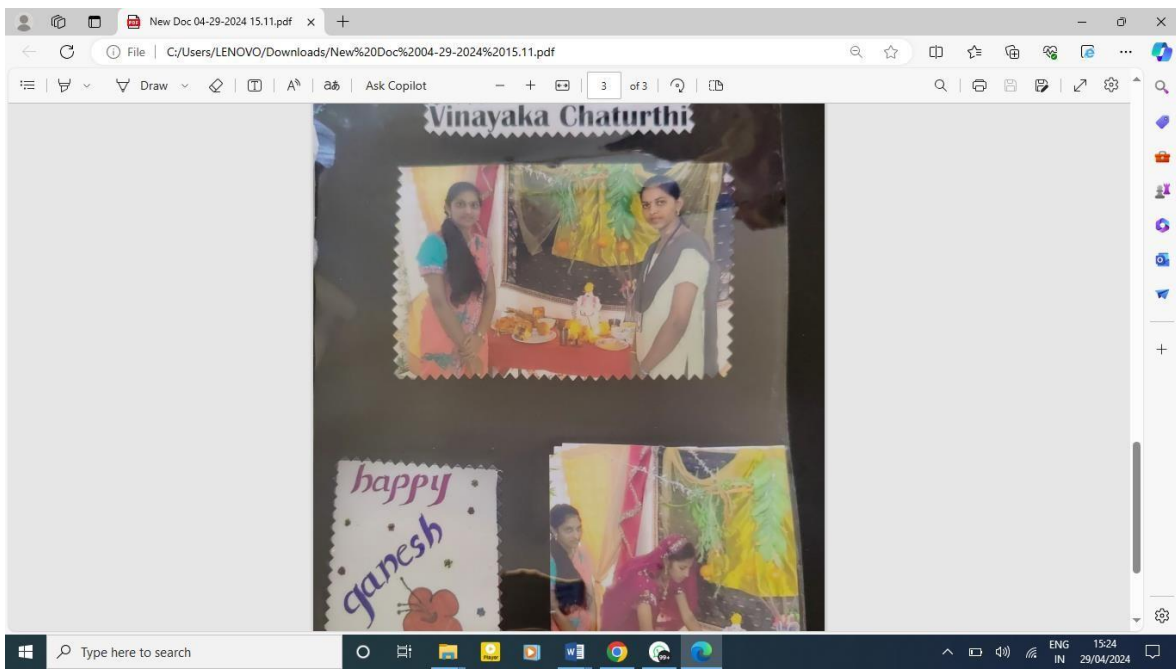

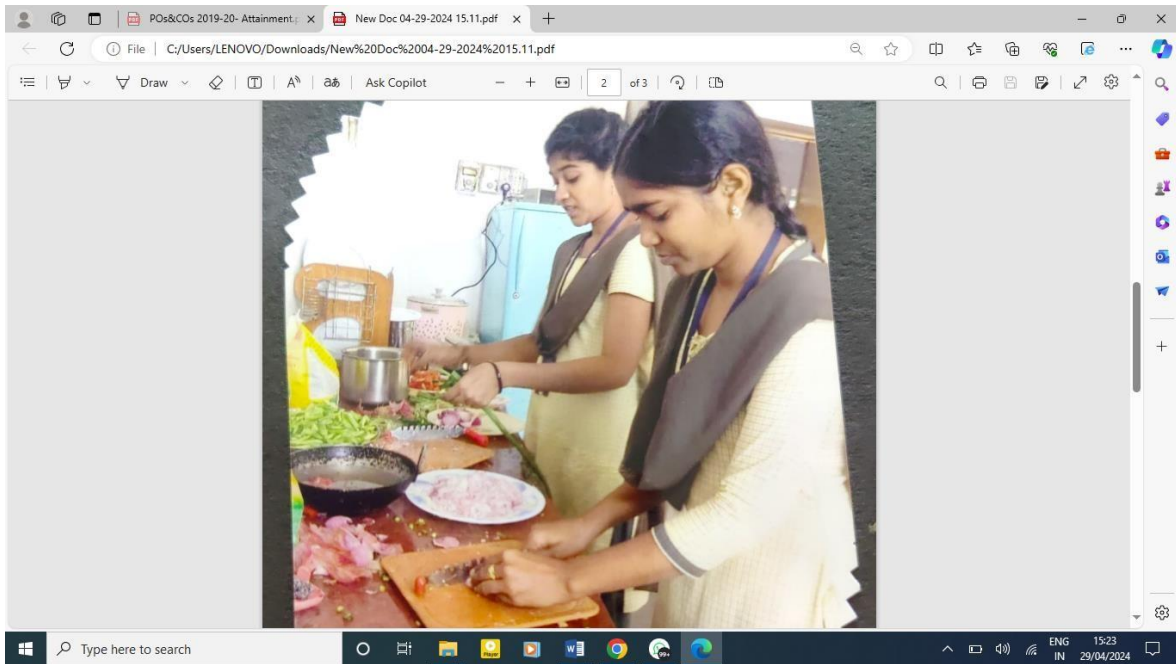

In cottage stay, students get an opportunity to make decisions and carry them out in action in an independent way. The students gain insight into managerial problems such as using limited resources. This experience teaches the students that the homemaking is a co-operative activity and not an individual affair. They learn that acquisition of certain basic skills and tasks are necessary for good housekeeping. They come to know the importance of management of Resources and also importance of weighing values and formulating goals and making new decisions. Residence course give opportunities to the students to use resources wisely and evaluate their accomplishments. It inculcates virtues like co-operation, adjustment and tolerance by giving opportunity for group living

Department of Home Science
Cottage Stay 2021-22**

Cottage Stay/Residence course is one of the traditional methods of teaching Home Science. The Residence course offers an excellent opportunity for the practical training in the management of Home. Cottage stay is conducted in the department of Home Science every academic year wherein the students of semester 6 are formed into groups and organize the cottage stay simultaneously attending the regular classwork.

Cottage Stay provides the students a Home like situation where they learn the skill of performing household activities using the available resources wisely and run and manage the household to the best of their abilities. The management process basically includes the three steps, viz.1) Planning 2) Execution or Controlling and 3) Evaluating.

The students are taught to utilize these three steps to manage household tasks assuming the dual role of the residence home maker and a student as they attend the college regularly and manage the residence also. The basic tasks include staying in groups, planning, controlling, and evaluating the finance; food, time, energy, care of the house, entertainment and the best possible utilization of individual and group abilities. Home Management cottage stay brings forth the practical aspects of management and provides a setting, which approximates the conditions and facilities of well managed house

In cottage stay, students get an opportunity to make decisions and carry them out in action in an independent way. The students gain insight into managerial problems such as using limited resources. This experience teaches the students that the homemaking is a co-operative activity and not an individual affair. They learn that acquisition of certain basic skills and tasks are necessary for good housekeeping. They come to know the importance of management of Resources and also importance of weighing values and formulating goals and making new decisions. Residence course give opportunities to the students to use resources wisely and evaluate their accomplishments. It inculcates virtues like co-operation, adjustment and tolerance by giving opportunity for group living

HIV /AIDS DAY RALLY & AWARENESS PROGRAMME -01.12.2022-

REPORT

As part of World Aids day, students of Red Ribbon Club of A.S.D. government Degree college for women(A) Kakinada had participated in awareness programme on HIV/AIDS organized by the district AIDS control unit and Awareness program on HIV /AIDS on 01.12.2022. The campaign was flagged off by the Principal Dr.V.Anantha Lakshmi, the rally to create awareness among the people to prevent AIDS. The world health organization was campaigning on the Theme "EQUALIZE" as it continued to create awareness throughout the year.

Students stated that the disease was not a problem of an individual, but a problem of society and it could be resolved by fighting together. The campaign helps people to know about the disease, its symptoms, prevention methods and treatment available for the people living with HIV/AIDS. Outcome of the programme is that it's a collective responsibility towards increasing aware and educated to handle the situation if someone in the family suffers from disease.

AIDS or Acquired Immunodeficiency syndrome, is a complex illness with a wide range of complications and symptoms. AIDS is the final stage of HIV. When individuals reach this stage, they are at a high risk for opportunistic infections due to their badly damaged immune system. Through this program Students came to know the tests available are Enzyme immunoassay (EIA) test, which use blood, oral fluid or urine to detect HIV antibodies Rapid HIV antibodies test. All individual should get tested for HIV at least once a year.
