DEPARTMENT OF COMPUTER SCIENCE

Massive Online Open Courses or MOOCs have gained quite a bit of popularity in the last five years. The word ‘massive’ is to be understood in the sense that 100,000 learners or more at the same time have open and equal opportunities to attend these courses. MOOCs are truly a tremendous technological leap, and what makes them so attractive is that they don’t imply any cost to learners.

A Massive Online Open Course falls under the category of distance education, in the tradition of education by correspondence and other forms of learning at a distance. In a MOOC, there are many forms of ‘distance’ that can be accounted for through computing technology.

Learners can be distant from their instructors and still attend a course. A wide array of students from around the world are taking classes ‘together’. These students are the most technologically advanced international real-time peers in history!

Solo Learn

SoloLearn is an online platform that offers a wide variety of programming courses designed for beginners to intermediate learners. SoloLearn is a beginner-friendly platform ideal for people looking to start learning programming or brush up on specific coding languages in a flexible, engaging way.

It provides interactive, bite-sized lessons in multiple programming languages such as Python, JavaScript, C++, Java, HTML, CSS, and SQL. The platform's key features include:

1. **Interactive Learning:** Lessons are structured in a question-and-answer format, allowing users to immediately apply what they learn.
2. **Community Engagement:** Learners can engage with the SoloLearn community through forums and challenges, fostering peer learning and problem-solving.
3. **Mobile-Friendly:** SoloLearn is available on both web and mobile, making it accessible for on-the-go learning.
4. **Free and Paid Versions:** While the majority of the content is free, there is a Pro version that provides additional features like detailed learning insights and ad-free experience.

Great Learning:

Great Learning is an online education platform that provides professional and higher education courses in various fields, including data science, artificial intelligence (AI), cloud computing, cybersecurity, digital marketing, and business management. It caters to learners seeking upskilling or career advancement through both free and paid programs.

A total of 22 students from III B.Com.(C.A.) have completed various courses offered through SoloLearn and GreatLearning successfully in the month of January, 2024 and obtained Course Completion certificates. Some of the courses completed by the students are Basics of Introduction to C& C++, Front End Development CSS and Excel for beginners.
