REPORT ON THE ONLINE QUIZ

On 29-07-2024, an online quiz was conducted using Quizizz, targeting II B.Sc. Computer Science students. The quiz focused on fundamental concepts in data structures, aiming to enhance students' understanding while providing an engaging platform for assessment. With the growing reliance on digital tools in education, Quizizz was chosen for its interactive features and user-friendly interface. A total of 15 students had participated in the quiz enthusiastically.

Objectives

The primary objectives of the quiz were as follows:

1. **Assess Knowledge:** To evaluate students' grasp of key data structure concepts.
2. **Promote Engagement:** To foster a fun and competitive learning environment.
3. **Identify Learning Gaps:** To pinpoint areas where students require additional support or instruction.

Methodology

Preparation

Questions were developed based on the course syllabus and aligned with learning outcomes. A mix of conceptual questions and practical scenarios was included to ensure a comprehensive assessment.

Administration

The quiz was administered online, allowing students to participate remotely. Instructions were sent via email, and a dedicated time slot was allocated for the quiz to ensure all students could attend.

Monitoring

Participation was tracked through the Quizizz platform. Immediate feedback was provided to students upon completion, allowing them to review their answers and learn from their mistakes.

Quizizz can be used to find and create free gamified quizzes and interactive lessons to engage any learner. Quizizz allows to conduct student-paced formative assessments in a fun and engaging way for students of all ages. The salient features include:

1. **Student-paced:** Questions appear on each student's screen, so they can answer questions at their own pace, and review their answers at the end.
2. **BYOD:** Can be played by students using any kind of device with a browser, including PCs, laptops, tablets, and smartphone.
3. **Thousands of public quizzes:** Amazing teachers around the world create thousands of great questions on Quizizz every day! This community effort generates great content that everyone can use.

- Quiz Editor:** The Quizizz editor is the most awesome quiz editor in the world! Well... we think so at least... do let us know if you don't agree :)
- We take the hassle out of creating quizzes by allowing you to pluck questions from any quiz, easily add images from the internet, auto-save your progress and tons of other features. [Learn more.](#)
- Reports:** The reports give you detailed class-level and student-level insights for every quiz you conduct. You can also download the reports as an Excel spreadsheet. [Learn more.](#)
 - Quiz Customization:** Teachers have multiple options to customize their quiz session to toggle the level of competition, speed, and other factors.

Reports generated by Quizizz will help the teacher to get real-time data and understand the strengths and weaknesses of the students of the class. The teacher can also use this data to plan out lessons based on the performance of students.

Conducting quizzes in this manner helped to motivate the students to complete assigned readings, increase participation in class discussion, and improve performance on exams for material covered both on the quizzes and in class. The Quizizz session was successful in assessing students' understanding of data structures while fostering an engaging learning environment. The results highlighted both strengths and areas for improvement, allowing instructors to tailor future lessons to better meet students' needs.

Name

Data Structures

Total questions: 20

Worksheet time: 21mins

Instructor name: Eswari Velugu

Class

Date

1. Data in the data structures are processed by operations like insertion, deletion, sorting, merging and

- a) Retrieval
- b) Both A and B
- c) Traversing
- d) Searching

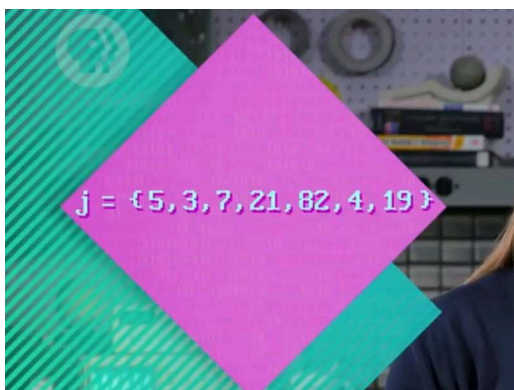

2.

A series of values stored in memory is called ____

- a) a matrix
- b) a tree
- c) an array
- d) a struct

3.

Almost all programming languages start arrays at ____

- a) index 2
- b) index 0
- c) index 1
- d) the null character

4.

MEMORY LOCATION	VALUE
...	...
1000	5
1001	3
1002	7
1003	21
1004	84
1005	4
1006	19

?

In almost all programming languages, what kind of bracketing is used to denote array access?

- a) curly braces
- b) square brackets
- c) round brackets
- d) quotation marks

5.

Arrays of characters, like letters, numbers, punctuation and other written symbols, are called ____

- a) vectors
- b) groups
- c) structs
- d) strings

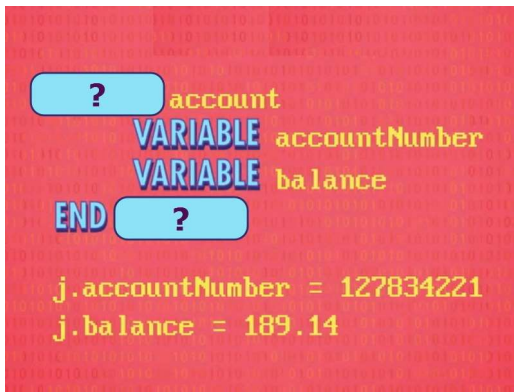

6.

<u>ARRAY OF SIZE 3</u>			
SUB-ARRAY 0	10	15	12
SUB-ARRAY 1	8	?	42
SUB-ARRAY 2	18	12	?

A two-dimensional list, which can be thought of as an array of arrays, is called ____

- a) a matrix
- b) a struct
- c) a tree
- d) a grid

7.

A data type that can be used to group items of possibly different types into a single type is called ____

- a) a struct
- b) a tree
- c) a root
- d) a pointer

8. `int nums[] = {2, 3, 5, 8, 9, 11};`

How would you access the **fourth** element in `nums`

- a) `nums[3]`
- b) `nums(3)`
- c) `nums(4)`
- d) `nums[8]`

9. Which of these is not a data structure?

- a) Integer
- b) List
- c) Array
- d) Stack

10.

What is a data structure?

- a) A way of keeping data without an order?
- b) There is no formal definition for "Data Structure"
- c) A "stack" only
- d) A method of arranging data

11. Ordered collection of data items of the same type referred to collectively by a single name

- a) Constants
- b) Array
- c) List
- d) Variables

12. It is a mathematical object which arises in many physical problems, consists of m rows and n columns

- a) Table
- b) Excel
- c) Array
- d) Matrix

13. Data Structure is a particular way of storing and organizing data in a computer so that it can be used efficiently.

- a) False
- b) True

14. _____ is a collection of elements used to store the same type of data.

- a) Loop
- b) Case
- c) Array
- d) Switch

15. Storage for data defined in terms of set of operations to be performed on the data

- a) Arrays
- b) Abstract Data Types
- c) Algorithms
- d) Variables

16. It use pointer to link nodes.

- a) Link List
- b) Pointer
- c) Trees
- d) Variable

- a) circular linked list
- b) doubly linked list
- c) linked list
- d) doubly circular linked list

18. Example of linear data structure except

- a) stack
- b) queue
- c) tree
- d) array

19. In _____ type of linked lists we can traverse in both the directions.

a) Circular linked list

b) Singly linked list

c) Doubly linked list

d) One dimensional linked list

20. _____ is a data structure in which every individual node consists of INFO to store data and LINK to store the address of the next node.

a) Queue

b) Stack

c) Singly Linked List

d) Circular queue
