GROUP DISCUSSION

2024-2025

A Group Discussion is a methodology used by any Organization to judge whether the candidate has certain personality traits and/or skills that it desires in its members. In this methodology, the group of candidates is given a topic or a situation, given a few minutes to think about the same and then asked to discuss that among themselves for 15 to 20 minutes.

| 20 | 2474022 | Chilaka Spoorthi |
| 21 | 2474023 | D. Sailaja |
| 22 | 2474024 | E. Manju Bhargavi |
| 23 | 2474025 | G. Kavya Sri |
| 24 | 2474026 | K. Lakshmi Sireesha |
| 25 | 2474027 | K. Dhana Sai Lakshmi |
| 26 | 2474028 | K. Akhila |
| 30 | 2474032 | Shaik Basheeramma |

Report on Group Discussion: "Social Media – Boon or Bane?"

A group discussion on the topic "**Social Media: Boon or Bane?**" was conducted, where multiple groups shared their perspectives on its impact on society.

Group 1: Social Media as a Communication Tool

This group emphasized how social media has transformed global communication. They highlighted that platforms like WhatsApp, Facebook, and Twitter have made it easier for people to stay connected, especially during emergencies. The group also pointed out how social media helps in networking, professional growth, and spreading awareness on important issues.

Group 2: Educational and Business Benefits

The second group focused on the positive impact of social media in education and business. They discussed how online platforms provide free educational resources, webinars, and courses that help students and professionals enhance their skills. The group also highlighted how businesses, especially startups, benefit from digital marketing, branding, and customer engagement through social media.

Group 3: Negative Effects on Mental Health

This group raised concerns about the psychological impact of excessive social media usage. They argued that over-reliance on social platforms leads to anxiety, depression, and low self-esteem, especially among teenagers. The group also mentioned the harmful effects of cyberbullying and the pressure of maintaining a "perfect" online presence.

Group 4: Spread of Misinformation and Privacy Risks

The fourth group discussed the dangers of misinformation, fake news, and privacy breaches on social media. They highlighted how false information spreads rapidly, leading to confusion and panic. The group also pointed out concerns regarding data security and privacy violations, emphasizing the need for stricter regulations.

Group 5: The Need for Responsible Usage

The final group concluded that while social media has both positive and negative aspects, responsible usage is the key. They suggested that users should limit screen time, verify news sources, and be cautious about sharing personal information online. They also emphasized the importance of parental guidance for younger users.

Conclusion

The discussion concluded with all groups agreeing that social media is a double-edged sword. It offers numerous benefits in terms of communication, education, and business, but its negative effects on mental health, privacy, and misinformation cannot be ignored. The participants agreed that responsible and mindful use of social media is essential to maximize its advantages while minimizing its drawbacks.
