 SOUMYA MUKKUDUPALLI (SOUMLYA ...)	 ✓ 10 ✖ 5	 67%	10/15	6000	Evaluate 	

REPORT ON THE ONLINE QUIZ

An Online Quiz was conducted in RB-IV on “Hypertext Preprocessor (PHP)” using Wayground (Quizizz) for the students of III B.Sc. (CS) to enhance their skill in PHP. A total of 28 students had participated in the quiz enthusiastically.

Objective

Quizizz is a popular game-based learning and assessment platform that allows educators, trainers, and organizations to create and deliver engaging quizzes, polls, and interactive lessons. It is widely used in schools, colleges, and corporate training environments for formative assessments, assignments, and live classroom activities.

Reports generated by quiz through Quizizz will help the teacher to get real-time data and understand the strengths and weaknesses of the students of the class. The teacher can also use this data to plan out lessons based on the performance of students.

Conducting quizzes in this manner helped to motivate the students to complete assigned readings, increase participation in class discussion, and improve performance on exams for material covered both on the quizzes and in class.

Outcome

The PHP quiz conducted through Quizizz aimed to assess students' understanding of fundamental PHP programming concepts such as syntax, variables, control structures and loops.
