REPORT ON THE JAM

Just A Minute (JAM) is a popular speaking activity conducted in schools, colleges, interviews, and competitions to assess a participant's communication skills within a limited time. In this activity, each participant is given a topic and must speak continuously for one minute without hesitation, repetition, or deviation from the subject.

Objective

The main aim of JAM is to develop and evaluate:

- Fluency in speaking
- Clarity of thoughts
- Confidence and stage presence
- Ability to think quickly
- Language skills and vocabulary
- Time management and spontaneous speaking skills

JAM is an effective and engaging method to build communication and thinking skills among students and professionals. It prepares individuals for real-world scenarios such as interviews, presentations, and teamwork. By practicing JAM regularly, participants become more confident and articulate speakers.

Outcome

JAM include improved fluency, confidence, and quick-thinking abilities in participants. It helps students express their ideas clearly within a short time, enhancing their vocabulary and communication skills. JAM also develops active listening, creativity, and logical thinking, preparing learners for interviews, presentations, and real-life communication situations.
