As the starting of Internship we learn basics of computer operating. next started to programming languages. C & JAVA. We gain a lot of technical knowledge about C and JAVA. every must and should practiced each and every program. to gain output.

After c and JAVA. We learn query language. This is My SQL. It is a query language.

After these three language, we started to learn data base languages HTML & CSS. I gained more technical knowledge on these languages; I learn each and. style in HTML and CSS. I create more and more web pages topics. to use all styles in these languages in various Topic.

The last one week. My attention is pay only on project work. This is to create a complete web site. on our selected topic. I select interior designing topic. Because to introduce everyone to the value of our Ancestors knowledge and skills.

I create complete website on interior designing with using CSS & HTML.

CHAPTER 2: OVERVIEW OF THE ORGANIZATION

A. Introduction of the organization:-

Due to the obvious rise in competitive pressures of pricing & expertise, Companies are forced to concentrate on their Mission critical Areas". Outsourcing through experts has become a necessity to optimise resource & time. Owing to this the services industry has developed rapidly.
S.V Soft tech HR service is one of the Companies which identified this potential explosion & prepared itself to deliver.

B. Vision ,Mission, and Values of the Organization

VISION

SV SOFTTECH HR & PLACEMENT a leading recruitment is going to convert into software soon with a team of professionals. Our projects will include Android development, Responsive website development.Our process to build software includes identifying a need, designing the program, and testing it for issues. In the end, our company strive to create solutions for consumers and satisfy the needs of end user by providing a good quality.

MISSION

SV Soft Tech HR Service has researched the Manpower requisitions closely to come up with customized recruitment modes to service this segment efficiently through a well-researched and scientific system.Executive Search & Staffing Solutions Practice are the professional & focused work segments of SV SOFTTECH HR services which has been developed with a Vision:" to pioneer innovative concepts through which it would provide qualitative recruitment & staffing solutions and assist the client organization to concentrate in its mission- critical areas".

VALUES OF THE ORGANIZATION

innovation, quality, transparency, teamwork, continuous learning. Innovation is key to staying ahead of the competition in this industry and creating new products or services that set the company apart.

C. POLICY OF THE ORGANIZATION, IN RELATION TO THE INTERN ROLE

SV SOFTTECH HR Services is a leading Recruitment & Staffing Company to Multi Nationals & large Indian Corporate across the industry verticals. We are committed to making progress and constantly challenging the status quo and paradigms to deliver innovative, cost effective solutions for continuous quality improvement in all our service offerings.

D. ORGANIZATIONAL STRUCTURE

There are basically 2 broad ways in which a software package development organization is structured: Project format and Functional format.
Project format:In the project format, a group of engineers is appointed to the project at the beginning of the project and that they stay with the project until the completion of the

project.Thus, the identical team carries out all the life cycle activities.Functional formatIn the functional format, totally different groups of programmers perform different phases of a project. For example, one team may do the necessities specification, another do the planning, and so on. The partially completed product passes from one team to a different because the project evolves.

E. ROLES AND RESPONSIBILITIES OF THE EMPLOYEES IN WHICH THE INTERN IS PLACED.

As an intern my responsibilities at SV Soft tech was to cover all aspects of creating web application to become a web developer. For this required core knowledge about designing tools like HTML, CSS etc.The main responsibility was to ensure that the web application designed must appeal to the desired target audience and, as a result, catches their attention and also include a working knowledge of different web browsers. While learning about web development I also gained knowledge about front end designing. During my internship period I mostly worked with designing "Training Management System" web application as well as other mini projects too.

6. FUTURE PLANS OF THE ORGANIZATION.

The future of software development is bright, with a wide range of new technologies and approaches that are poised to transform the way we build and use software.

CHAPTER 3: INTERNSHIP PART

Description of the Activities/Responsibilities in the Intern Organization during Internship, which shall include – details of working conditions, weekly work schedule, equipment used, and tasks performed. This part could end by reflecting on what kind of skills the intern acquired.

As I did my Internship in S.V. Soft tech in kakinada. S4 is computer technological institute. This report will provide comprehensive insight functioning information about."

Due to the obvious rise in competitive pressures.of the pricing & expertise, companies are forced to concentrate on their "mission critical Areas" out sourcing through experts. has became a necessity to optimize resource the time.

The first day of internship we were in a search for the best intern organization for 3 months internship.I learned about c-language Syntax & structure. Practiced Some Programs in system like Hello world, Addition, Arthematic it else conditions.

Owing to this the services industry has developed rapidly. A S.V Softtech HR services is one of the Companies, which identified this potential explosion & prepared itself to delver.

In S.V soft tech institute, have more services. Training of students and equipping them with life skills is responsibility of our institution. Along with technical expertise - development of a holistic personality is also necesary.

To meet out these requirements, o-fully fledged training cell is operating in our company to enhance the capabilities of students on par with the industry standards. We provide 100% job Assistant and professional help to find job in Banking, Financial & insurance services, IT technology etc.

WEEKLY REPORT

WEEK – 2 (From Dt..... to Dt.....)

Objective of the Activity Done:
Detailed Report:
On the first day Inauguration of our long term internship, sir discussed about the software languages to be learned in the internship. He gave brief introduction about internship & software courses on the second day I learned. Some key Point in system. The keys points are used to operate the system in a simple way. on the third day sir gave short cut keys in c language notes & we started writing the notes. on the fourth day I learned about short cut keys which are used to operate the system on the fifth day. sir started software courses i.e, c language. Sir gave introduction of c-language & syntax & structure. I Learned and Practiced Some Programs in c language. They are 1. Hello World Program 2. Addition program. 3. Arithematic program conditions and if & else conditions. On the fifth day we practiced c-language Programs in system.

C is a procedural programming language initially developed by Dennis Ritchie in the year 1972 at Bell Laboratories of AT&T Labs. It was mainly developed as a system programming language to write the UNIX operating system.

The main features of the C language include:

- General Purpose and Portable
- Low-level Memory Access
- Fast Speed
- Clean Syntax

These features make the C language suitable for system programming like an operating system or compiler development.

Why Should We Learn C?

Many later languages have borrowed syntax/features directly or indirectly from the C language. Like syntax of Java, PHP, JavaScript, and many other languages are mainly based on the C language. C++ is nearly a superset of C language (Only a few programs may compile in C but not in C++).

So, if a person learns C programming first, it will help him to learn any modern programming language as well. As learning C help to understand a lot of the underlying architecture of the operating system. Like pointers, working with memory locations, etc.

Structure of C Program

	1	`#include <stdio.h>`	Header
	2	`int main(void)`	Main
BODY	3	`{`	
BODY	4	`printf("Hello World");`	Statement
BODY	5	`return 0;`	Return
BODY	6	`}`

Arrays

Normally, an array is a collection of similar type of elements that have contiguous memory location. Array is an object which contains elements of a similar data type. Additionally, the elements of an array are stored in a contiguous memory location. It is a data structure where we store similar elements. we can store only a fixed set of elements in a java array.

Array in Java is index-based, the first element of the array is stored at the 0th index, second element is stored on 1st index and so on.

Types of Arrays

1 DArray
2D Array
Multidimensional Array.

Advantages

Code optimization: it makes the Code optimized, We can retrieve or sort the data efficiently.

Random access: we can get data located at an index position.

Disadvantages

Size is fixed

we can only store homogenous elements

Memory wastage is more

Introduction (5:10)

Java is a statically programming language which is used for building applications.

Applications are of two types:

- Standalone applications.
- Web applications.

Standalone applications are used without internet.
Ex:- MS-Excel, Microsoft Word, Calculator.

Web applications are used with internet.
Ex:-Amazon, Gmail, Yahoo.

Editions of Java:

- J2SE (Java Standard Edition)
- J2EE (Java Enterprise Edition)
- J2ME (Java Micro Edition)

Java standard edition is used for building standalone applications.
Java enterprise edition is used for building enterprise applications.
Java micro edition provides a robust, flexible environment for applications running on embedded and mobile devices in the Internet.

Features of Java:

- Java is platform independent.
- Java supports OOPS concepts.
  - Inheritance.
  - Abstraction.
  - Interface.
  - Polymorphism.
  - Encapsulation.
- Java supports exception handling mechanism.
- Java is architecture-neutral.

ACTIVITY LOG FOR THE SIXTH WEEK

Day & Date	Brief description of the dailyactivity	Learning Outcome	Person In-Charge Signature

Sample Program:

```
class test
{
  public static void main (String [] args)
  {
    //statements//
  }
}
```

Variables:

Variable is a name given to memory location to store data.
Ex: int x=10

Instructions for variable:

- Variable Declaration int x;
- Variable Initialization x=10;

Sample Program:

```
class A {

    public static void main(String args[]) {
        int x = (int)97.0;
        System.out.println(x);
    }

}
```

Output: 97

Break Statement:

JVM checks line by line code. if it finds break statement then it will come out of the loop used in switch cases and loops.

Continue Statement:

If JVM finds continue statement in code then it will skip next statement and continues executing remaining statements. Continue statement is only used in loops.

Day –6	Today I practiced programs in java. Inheritance 2 programm. Import package etc	Learned java programs.	

Compiler:

Compiler performs translations technically called compilation.

Once source code is ready compiler converts source code to byte code or .classfile or classfile.

In java we will use java compiler known as javaC. Once the byte code is ready we can run that byte code in any operating system because of this feature java is platform independent.

We have to save the program as .java
Ex: filename.java

Interpreter:

Interpreter performs translations technically called compilation.

Difference between Compiler & Interpreter:

Compiler	Interpreter
It converts source code into byte code	It converts byte code into binary code.
Compiler checks syntax	Interpreter checks line by line code.
If syntax is wrong error displays known as compiler time error.	If code is wrong error displays known as runtime error.
Ex: javaC	Ex: JVM

Day – 6	Today I learn data types in SQL sample program, data types in SQL preliminary key and unique key.	learn SQL data base language.	

WEEKLY REPORT

WEEK – 8 (From Dt._____ to Dt : Dt._____)

Objective of the Activity Done:

Detailed Report:

In this week. On the first day I write JAVA notes from JAVA Introduction to loops. on the next day I write JAVA notes from Scanner class to abstraction. On the next day I write JAVA notes from method hiding to encapsulation, including Inheritance Interface polymorphism, etc.

On the next I write JAVA notes from method hiding to three rules of constructor. Today I learn introduction of SQL Language in SQL. Types of SQL. Today I learn data types in SQL Sample program data types in SQL preliminary Key and unique Key.

Data Types:

Data types are used to reserve memory space. It depends two things:

- Size of data.
- Type of the data.

Types of data type:

Byte = 1 byte
Short = 2 bytes
Int = 4 bytes

Long = 8 bytes
Float = 4 bytes
Double = 8 bytes
Char = 2 bytes
Boolean = 1 bit

} Primitive Data Types

String = infinite — Non-Primitive data types

Primitive Data type:

Primitive data type defines size and type of variable values. There are 8 types of primitive data types. In this type of data small memory blocks are created.

Non-Primitive Data type:

In non-primitive data types we cannot define size of the data. And objects are created for non-primitive data types.
Ex: string, student object, employee object.

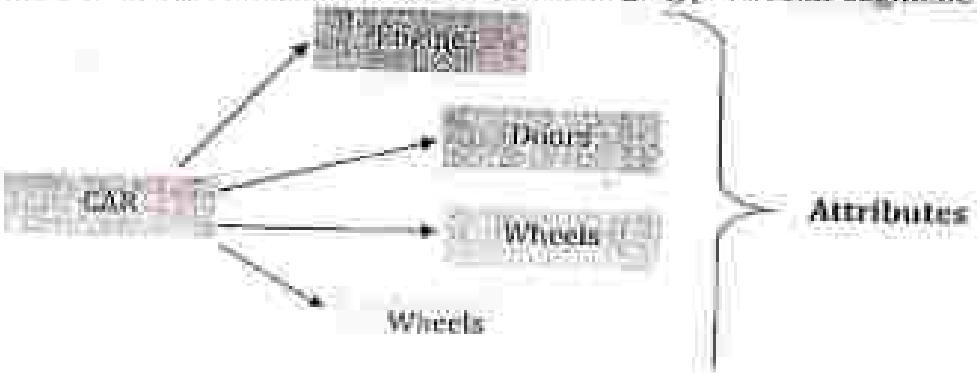
Tokens:

Elements in java program are called tokens.

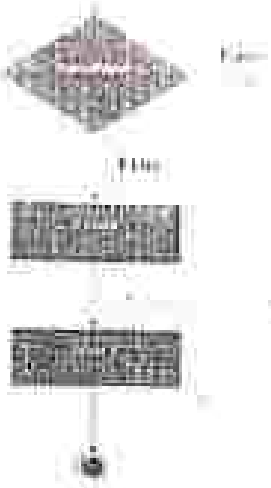
- **Keywords:** (predefined words by jvm)
  - Ex: class, static, public.
- **Identifiers:** -(user defined words)
  - Ex: variable name, class name, method name.
- **Data/Literals:**-(raw factors which describe attributes)
- **Separators:**-(),{},[].

Attributes: common features which describe object belonging particular segment.

Ex:



Flow Chart:



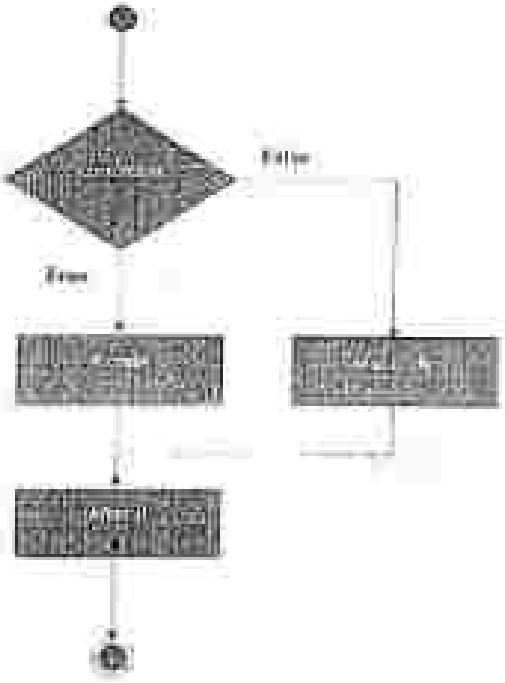
If Statement

If Statement test the condition. It executes the if block if condition is true.

If block executes based on conditions

If condition is true then if block executes, if false it executes next statement.

Flow Chart:



If else Statement:

If else statement also test the condition. It executes the if block if condition is true otherwise else block is executed

If Else If Ladder: If-else-if ladder statement executes one condition from multiple statements.

Concatenation: Concatenation is an operation to join two or more strings and return a new one.

OOPs is a methodology or paradigm to design a Program using classes and objects. It simplifies software development and Maintenance by Providing some concepts.

Inheritance

Abstraction

Interface

Polymorphism

Encapsulation

In Java we have various return types

void: If we keep void as return type then Method expects nothing in return

Int: If we keep int as return type then Method expects one integer type in return

char: If we keep char as return type then Method expects one char type in return

string: If we keep string as return type then Method expects one string type in return
